POMONA UNITED NURSERIES
DANSVILLE, N. Y.

From Nursery Direct to You

Everything Needed to Beautify Your Home and

Shipped C. O. D. You Pay When Stock Arrives

We Pay Freight, Express and Postage

1923
Pomona Ship C. O. D. Prepaid

*Freight, Express and Postage*

We Trust You. No cash required to apply on account when ordering shipped C. O. D.

*All Orders of $7.00 and over we prepay Express and Freight charges to the following list of states.*

To all other points on orders of $7.00 and over we prepay one-half of the transportation charges.

**To all who prefer to send Cash with Order a 6% discount will be allowed.**

*NO DISCOUNT ALLOWED ON C. O. D. ORDERS*

---

**Order Trees Early**

Wherever you live it pays to order early. Send in your order just as soon as you know what you want Pomona method of shipping C. O. D., and requiring no cash with order makes it convenient for you to do this, and we want you to get your trees and plant them as soon as the weather conditions and the preparation of your land will permit, either spring or fall. It is merely a question of doing it.

**Our Shipping Season**

We pack and ship all winter to Southern States. Our regular Spring packing and shipping season usually opens here about the first of April, and continues into the month of May. The planting season is not regulated by any particular month or day, nor by the state of vegetation where the planting is to be done, but by the condition of the trees to be planted. Hence, trees can be sent with safety from Dansville, N. Y., to localities several degrees south, even if they do not arrive until the ordinary transplanting season in that locality is passed.

**In Filling Your Order**

We will furnish varieties ordered insofar as our stock admits. In case we are out of a variety or size called for, we reserve the right to substitute another similar variety of equal merit or another size or grade of equal value. We shall do our best to make every shipment satisfactory and profitable to our patrons. In the event that any nursery stock sold by us should prove untrue to name under which it is sold, we hereby agree, on proper proof of such untruthness of name, to replace the original order or to refund the purchase price. Except for such liability, and in respect to all nursery stock sold by us, we give no warranty, express or implied, as to description, quality, growth, productiveness or any other matter.

**How to Remit**

If you prefer to take advantage of our 6% discount and send cash with order it should be made by check, Post Office Money Order, Express Money Order, Draft on New York Bank or Registered Letter. We disclaim all responsibility unless remittances are made as above directed.
A Splendid Collection of 10 Gladiolus Bulbs

This collection is made up with choice mixed varieties, carefully selected in a wide range of colors which will bloom the first season planted.

To encourage our patrons to forward their order early we have decided to give entirely Free 10 Choice Gladiolus Bulbs with all orders of $7.00 or more received by us on or before April 1st, 1923.

Remember you get this choice collection of Ten Gladiolus Bulbs Free, postpaid with all C.O.D. and cash orders of $7.00 or more received by us on or before April 1st, 1923.

PRICE OF CHOICE MIXED VARIETIES OF GLADIOLUS BULBS
10 for $1.00, 25 for $2.25, 50 for $4.00, 100 for $7.00.
By Mail postpaid.
Introduction

It is with pleasure that we again greet our many customers and friends. Last Spring, for the first time we met you as Pomona United Nurseries which was a consolidation of Wells’ Wholesale Nurseries, Sheerin’s Wholesale Nurseries and Pomona Nurseries brought about through the financial co-operation of several of Dansville’s leading business men which tends towards greater economies of management and adds greatly to the facilities and strength of the business.

The active management is under the charge of F. W. Wells, who has been actively interested in the nursery business for thirty-two years as grower and seller of nursery stock direct to the planter.

In making this consolidation we were conscious of the fact that by far the most valued asset of any concern is its satisfied customers and it was in full confidence that the list of customers of the nurseries consolidated would continue loyal to the new concern that we were prompted to engage in the enterprise.

And we wish to thank many of the former customers of the firms mentioned for their loyal support as our business during the past Spring greatly exceeded our expectation, which we know was due to the co-operation of friends.

Recognizing the fact that in mail order business in general there is a growing tendency toward the C. O. D. method of delivery, we were the first nurserymen to adopt the policy of offering to deliver all orders on a C. O. D. basis.

CERTIFICATE

No. 2418

STATE OF NEW YORK
Department of Farms and Markets
Certificate of Inspection of Nursery Stock

This is to certify that the stock of Pomona United Nurseries, of Dansville, County of Livingston, State of New York, was duly examined in compliance with the provisions of article 14 of the Farms and Markets law, and was found to be apparently free from any contagious or infectious disease or diseases, or the San Jose scale, or other dangerously injurious insect pest or pests. This certificate expires Sept. 1, 1923.

By GEO. G. ATWOOD, Director Bureau of Plant Industry.

We Have Extensive Plantings At Dansville & Geneva N. Y.
Ship From the Nearest Point and by the Most Direct Route.
**REFERENCES**

Notwithstanding the fact that it is our policy to sell on a C. O. D. delivery basis we cheerfully refer you as to our responsibility to any bank or business man here in Dansville, or if desired we can doubtless refer you to customers in your vicinity.

Dwarf Pear Collection No. 114

Bearing Age Trees 5 Years Old

We have several thousand Dwarf Pear Trees that have been transplanted two years that are bearing fruit this summer.

These Trees Will Bear the First Year Planted

We offer a special list of varieties for the home garden in a collection of six trees, as follows:

2 Seckel       2 Duchess
1 Bartlett     1 Clapp's Favorite

All 6 Bearing Age Trees, 4 to 5 feet high for $4.85

Plant Dwarf Pear Trees in a Hedge Row 6 Feet Apart for Good Results

There is scarcely a city or town lot so small that room cannot be found for a few Dwarf Pear Trees.

Our Home Apple Orchard Collection No. 112

10 Standard Apple Trees, 2 Year, 4 to 5 Feet High for $6.00

1 Baldwin
1 Northern Spy
1 Wagener
1 R. I. Greening
1 Spitzenburg
1 Banana
1 McIntosh
1 Delicious
1 Red Astrachan
1 Yel. Belleflower

All 2 Year Trees
4 to 5 Feet High

OUR PRICE $6.00

Our Home Apple Orchard is as much a part of the suburban, small town and farm home as a garden. The apple orchard, however, once planted, is there to stay, growing in size, beauty and value each year and greatly increasing the value of your farm or town real estate. All varieties in our Home Apple Orchard Collection are the very best for dessert and cooking from early fall to late winter. You can combine the orchard and garden by growing vegetables between the trees. Or, you can plant the trees in your chicken run which in a short time will provide the needed shade for your flock. These trees can be planted as close as twenty feet apart each way and give good results.

Our Price $6.00

AGENT'S PRICE $15.00

In Filling Your Orders

We will furnish varieties ordered insofar as our stock admits. In case we are out of a variety or size called for, we reserve the right to substitute another similar variety of equal merit, or another size or grade of equal value. We shall do our best to make every shipment satisfactory and profitable to you.

Don't fail to plant these collection's for Profit, Health and Beauty
Propagated Where the Best Trees Grow

The Planting and Care of Fruit Trees

Pruning the Tree

Pruning the Tree is a matter of great importance. The illustration here shows the correct way to trim for planting. Severe pruning may seem for a time to injure the appearance of the tree but this is the way to get proper results.

Planting

The hole must be large enough to receive the roots freely, without cramping or bending them from their natural position; the larger the better. Let the tree be the same depth it stood in the nursery (the old mark can be readily discerned) and not deeper, except in the case of dwarf trees. These latter should be set so that the point of union comes two or three inches below the surface of the ground. The tree being held upright, the finest and best earth from the surface should be carefully worked among the roots with the fingers, filling every space and bringing every root in contact with it. Set the tree as firm as a post, thoroughly packing or stamping the earth.

Pruning Peach Trees After Planting

When growth starts, prune the peach trees to a whip, and cut them back to whatever height you desire your trees headed. We prefer heads not higher than 18 inches.

Number of Trees or Plants to an Acre. The following table will show how many trees or plants are required for an acre at any distance apart:

When Trees Arrive

When trees arrive, unpack at once, cut open the bundles and heel them in without any delay, each variety by itself. Be sure that the labels are carefully kept with each bundle. Do your work carefully and thoroughly. See that no water stands around where the trees are trenched. Dig a ditch leading off from where the trees are trenched, to carry the surface water off. Be careful to see that all straw and moss is removed from the trees before trenching. When unpacking and trenching, if the least bit dry, "puddle" the roots before heel-in.

Preparing the Soil

For fruit trees the soil should be dry, either natural or made so by thorough drainage as trees will not live or thrive on a soil constantly saturated with water. It should also be well prepared beforehand by at least twice plowing, using the subsoil plow after the common one at the second plowing. On new fresh lands, manuring will be unnecessary; but on lands exhausted by cropping, fertilizers must be applied, either by turning in heavy crops of clover, or well rotted barn-yard manure. To insure good growth of trees, land should be in as good condition as for a crop of wheat, corn or potatoes.

Labels

Labels should be removed and some other method adopted for recording varieties. The wires will cut and damage the limbs.

Mulching

When trees or bushes are planted, they should be mulched or covered with a layer of coarse manure or litter from three to six inches deep for a space of say, two feet more in diameter than the extent of the roots. This keeps the earth moist and at an even temperature.
Pomona's Dansville Grown Trees

There is a difference in trees. No two are alike, just as two dairy cows may have the same general appearance, yet one may be worth several times as much as the other as it nets the owner a larger profit while the other does not earn her feed, so may there be an equally great, if not greater difference in nursery stock—with one exception, the unprofitable cow can be sold while the unprofitable orchard can be disposed of only by pulling it out. Pomona trees have all the qualities which make early bearing, long lived and productive orchards. They are grown and handled in a thorough manner from the time the stock is planted until the trees are delivered to you. Many men who plant an orchard have but a vague idea of what constitutes a first class tree. Such a man can investigate carefully and buy from a reliable nursery—a nursery like the Pomona United Nurseries whose manager's life work has been growing trees for business and home orchards the past thirty-two years and who is personally acquainted with orchard and garden requirements in every part of the union. But the experienced fruit grower, the man who knows a good tree, and then plants a second class one because it is cheaper, is to be pitied. Cheap trees are seldom, if ever, a bargain. The planter should insist having first class trees and be willing to pay a fair price for them.

What Age Trees to Plant

We grow and sell both one and two year old trees. Pomona Trees are as thrifty and vigorous as is possible to grow them. We prepare our land, cultivate and work with the trees so that we practically control their developments. In buying trees, please keep in mind that it is the most vigorous individual trees that are the best. In setting trees, have little to do with the age at which the tree comes into bearing, so that one really saves nothing in setting trees too large to start with. Plant either one or two year old trees. Good orchards have developed from both.

Two Year Trees

Most orchardists prefer two year old trees and buy them from us year after year. Prof. Waugh says: "Some planters prefer one year old stock, and when it is large and well grown it is almost, or quite as good, as two year old stock. For the most part, however, two year old stock is to be recommended. Anything older than two years is strictly undesirable."

Root Growth. Note the large, vigorous, well balanced roots of Pomona Dansville grown trees. This development is due to our superior soil and special method of culture. It is impossible to secure roots like these without the right methods of propagation and culture. This done at the right time not only to give the tree the right amount of growth, but force the roots to develop and spread.
One Year Old Trees

One year old trees are preferred by many of the Western and Eastern planters. A one year tree to be satisfactory must be grown just right. Many nurserymen lack the skill and experience to grow good one year old trees, and for that reason they have recommended and listed two and three year old trees. Why plant one year trees? Prof. F. C. Sears of Massachusetts Agricultural College, says: "Personally the writer is rather strongly in favor of the one year tree for the following reasons: It costs less. Only thrifty trees are salable at one year. The trees can be headed at any desired height. It will stand transplanting better."

Other Reasons

Successful fruit growers and government experts who have made tests prefer a well grown one year old tree. They can be cultivated close the first year without barking the limbs; are less apt to lean with the prevailing winds and when properly cared for they bear fruit as soon as older trees. The one year old tree is a straight whip with few if any side branches. Note the accompanying photograph showing our one year old apple trees. We call your attention to the strong, stocky bodies and vigorous roots.

Mature Trees Insure Your Success

We grow the trees right and allow time in the autumn for the growth to stop and the roots to mature. We will not dig a tree until it is dormant and in good condition. We cannot ship your order in the fall before the trees are matured. If you must have immature, sappy trees from which the leaves have been stripped, we prefer that you purchase from some one else. We will ship your fall order as soon as condition of the trees will permit digging—usually early in October. After that we can ship whenever you want them.

Pruning

We prune our two year trees in the nursery with the same care they should get in the orchard. They are grown over at different times during the growing season and are given better care than most trees in the orchard.

Our Trees dug by Steam Power.

By this method you are sure of good roots.

We dig our trees as far as possible by steam power as illustrated. This enables us to secure good roots and tops which cannot be obtained by digging with horses and spade. We will not dig during hot or freezing weather. As soon as the trees are taken from the ground they are loaded on wagon and immediately taken to the packing house, graded and tied in bunches under cover, hence the roots are not exposed to the sun or wind.
Pomona United Nurseries, Dansville, N.Y.

**DUCHESS OF OLDENBURG**—The most productive and profitable Early Fall Apples

Red Astrachan—The well known early variety. Fruit large, roundish, nearly covered with deep crimson, juicy, rich, acid and fine. Highly regarded on account of its fine appearance, earliness and hardiness. Tree a vigorous grower and sure bearer. Aug.

Yellow Transparent—A Russian variety. Tree an upright grower and a very early and abundant bearer. Fruit of good size; skin clear white, turning to a pale yellow; flavor acid and very good. Ripens from ten days to two weeks earlier than Early Harvest.

Early Harvest—Medium to large; pale yellow; fine flavor. Tree a moderate, erect grower, and a good bearer; a beautiful and excellent variety for orchard and garden. Aug.

Sweet Bough—Large, pale greenish yellow; tender and sweet. Moderate grower and a good bearer. Aug.

Early Strawberry—Medium, striped with deep red; tender, sub-acid and excellent; a poor grower but productive. Aug.

Williams' Favorite—A bright red apple, of mild, agreeable flavor. Aug. to Sept.

Carolina Red June—Small or medium, deep red, quality good. Tree hardy and a fine grower. Aug.

Golden Sweet—Large, pale yellow, tree a good grower and very productive. Aug. to Sept.

Fanny—Large, deep rich crimson, tender, juicy, pleasant. Tree vigorous and very productive. Aug.

WEALTHY—Hardy, high quality and the best money maker of its season

Wealthy—This is a beautiful, hardy winter apple, originating in Minnesota. Fruit large, roundish; skin smooth, oily, covered with a dark red. Flesh white, tender, juicy, vinous, sub-acid; quality very good. In season it differs somewhat, according to locality; in New York and neighboring states its season is Dec. to Feb.

Maiden’s Blush—Medium size, flat, quite smooth and fair; pale yellow with beautiful red cheek. Tender, sprightly, pleasant acid flavor. Tree vigorous and productive. Good market variety. Sept. and Oct.

Gravenstein—An apple of excellent quality. For culinary purposes it is perhaps unexcelled by any variety of its season. Fruit large and uniform in size, skin thin, tender greenish yellow overlaid with dark red. Sept.

Fall Pippin—Very large, roundish, oblong; yellow; flesh tender, rich and delicious. Tree spreading, and a fine bearer; valuable for table or market use. Sept.

Alexander—A Russian variety, very hardy and abundant bearer. Fruit large, deep red; flesh white, crisp, tender, good flavor. Oct.

Pumpkin Sweet (Pound Sweet)—A fine, large, yellow sweet apple. Excellent for baking or stewing. Oct. to Jan.

Autumn Strawberry—Medium, streaked, tender, juicy, fine and productive. Sept. to Oct.

DO NOT DELAY PLANTING

There are 65,000,000 less Apple Trees in the orchards of the U. S. today than ten years ago.

Decrease: 29,213,833 Per cent of decrease: 45.0

These figures were issued by the Department of Commerce, Washington, D. C. June 27, 1921.

Duchess of Oldenburg—A Russian variety of large size and beautiful appearance. Roundish, streaked with red and yellow, flesh white, tender, juicy and fine. A cooking apple of highest quality and esteemed by many for dessert. Tree a strong vigorous grower and abundant bearer. Succeeds well in the Northwest.

Rambo—Medium streaked and splashed with red, rich, sub-acid. Oct.

FAMEUSE—The Best Late Fall Apple

Fameuse (Snow Apple)—Hardy, Medium size; deep crimson; flesh is snowy white, tender, melting and delicious. Tree vigorous with dark wood; one of the finest dessert fruits, and valuable for market; succeeds particularly well in the North. Nov. to Jan.
Wagener—(Red Winter Apple.) One of the most beautiful winter apples ever grown. It is of the highest quality, the flesh being crisp, tender and aromatic. We know of no apple possessing greater beauty or of finer quality than the Wagener. It succeeds well East and West. Dec. to May.

McIntosh Red—An exceedingly valuable Canadian sort; medium size, nearly covered with dark red; flesh white, fine, very tender, juicy and refreshing. A good annual bearer of fair, handsome fruit. Resembles the Fameuse, but larger and more hardy, and fully equal in quality to this standard sort. Its season of ripening varies according to the location. In Northern New England it is a winter variety while in sections a little further South it is considered a fall or early winter apple.

Roxbury Russet—Medium to large. Surface rough, greenish covered with russet. Tree free grower, spreading; a great bearer. Keeps until June.

Esopus Spitzenburg—Large, deep red with gray spots, and delicately coated with bloom; flesh yellow, crisp, rich and excellent. Nov. to Apr.

Stayman's Winesap—Fruit medium, large; skin green and yellow, red-striped; flesh yellow, firm; quality excellent. A seedling of Winesap but larger, better and more productive. Dec. to Apr.

Opalescent—Probably the handsomest Apple ever put on the market. It is large and shapely and a veritable feast to the eye. Color light, shading to very dark crimson; skin smooth; susceptible of a very high polish reflecting objects like a mirror; flesh yellowish, tender, juicy and good. Dec. to March.
Baldwin—A great market apple, very productive of fair handsome fruit. No variety yields larger crops or bears shipment better, or is more attractive in color, size and shape, than the Baldwin. It is esteemed as an eating apple, and for cooking. Thousands of barrels of this fruit are exported to England annually. For a commercial orchard it can be relied upon. Large, bright red, crisp, juicy and rich; tree vigorous, upright and productive. In New England, New York, Ontario and Michigan, this is one of the most popular and profitable sorts for table or market. Dec. to March.

Rome Beauty—A large and handsome, apple, almost entirely covered with bright red, of high quality. The flesh is tender, juicy and highly flavored. It is a popular apple over a wide range of country, particularly in the West. Dec. to March.

Newtown Pippin (Albemarle Pippin)—This is one of the best apples for shipping to foreign markets. When fully ripe it is yellow with red cheek and a smooth skin.

Northwestern Greening—A hardy winter apple of very large size, much larger than R. I. Greening. This apple is highly prized in localities where the ordinary Greening will not succeed. One of the best of the hardy kinds. The size is large, very round and symmetrical in shape; color, green, which turns yellow at full maturity; flesh yellowish, fine grained, tender, juicy; sub-acid; quality good. Jan. to Apr.

Twenty Ounce—Very large; greenish, becoming yellow, mottled and splashed with bright red. Flesh tender and juicy. Sept.

Grimes' Golden—Medium to large size; skin golden yellow, sprinkled with gray dots; flesh crisp, tender, juicy, sprightly, very good to best. Grown in the South and Southwest. Jan. to April.

Smokehouse—This grand apple is a great favorite in Pennsylvania and doesn't seem to be known much elsewhere. Tree a vigorous grower, healthy, hardy and a reliable cropper. The fruit hangs well to the tree and is of good color and quality, uniform in size and shape. Oct. to March.

Gano—A fine commerial sort. Very hardy. A half brother to Ben Davis, though of better quality. Very richly colored, uniform in size; keeps until March; rapid grower, fruit very handsome, flesh pale yellow, mild, sub-acid, good.

Yellow Belleflower—Season, winter. A hardy apple of large size, a beautiful golden color, often with red, blush; conical in shape. Flesh very tender and fine grained, crisp, juicy, sub-acid, of excellent quality. Oct. to Feb.

Boiken—Medium size; yellow, tart, acid, long keeper. A very good cooking apple.
Winter Varieties of Apples

Rhode Island Greening—This large and superior winter apple is famous over a large extent of country, and is more highly prized for cooking and eating than any other variety. It is a good keeper but will keep better if picked early. This Greening is a beautiful yellow color when ripe, and is a most abundant yielder. March to April.

Sutton Beauty—Fruit large, waxy yellow striped with crimson; flesh white, tender, juicy, mild acid; quality good and a remarkable keeper. Dec. to Feb.

Golden Russet—Medium to large size, dull russet, with a tinge of red on the exposed side; flesh greenish, crisp, juicy, and high flavored; hardy, bears well. Nov.

Jonathan—A beautiful red apple, highly flavored and of excellent quality, being tender, juicy, spicy, and rich—a splendid family sort and highly profitable for market. Tree long-lived, productive. Nov. to Apr.

King of Tompkins County—One of the standard varieties grown for commercial purposes, and gives the greatest satisfaction when top-worked on some harder variety. The fruit is of a bright red color, large and uniform. It is well adapted for marketing in fancy packages and is in good demand for both special and general trade, often selling at an advance over standard varieties.

Hubbardston (Nonesuch)—One of the earliest bearers. Large, striped yellow and red; flesh yellow, juicy and tender with an agreeable flavor, strong grower; bears well every year.

Delicious—This apple is appropriately named for its handsome appearance as well as high quality. Everyone should plant one or more trees. Fruit large, oblong, nearly covered with bright red; of the highest quality.
Winter Banana—Perfect in form; golden yellow, and beautifully shaded with bright crimson red; flesh lemon-yellow, fine grained, sub-acid, rich, aromatic flavor, and of the highest quality. A good keeper. Tree remarkably strong grower. A valuable market variety. Nov. to Jan.

York Imperial—A fine, hardy, large, red apple; succeeds over a wide range of country. A fine market sort, bringing highest prices. Fruit large, oblong, smooth, skin yellow and nearly covered with light to dark red; flesh yellow, juicy, firm, sub-acid, good. An early bearer. Nov. to Feb.

Seek-No-Further—Medium to large, slightly russeted with dull red stripes; tender, rich, spicy and fine; good grower and bearer. Nov. to Feb.

SELECT VARIETIES OF CRAB APPLES

Whitney’s Seedling—Large, averaging one and one-half to two inches in diameter; skin smooth, glossy, green striped, splashed with carmine; flesh firm, juicy and rich. A great bearer and very hardy.

Transcendent—Medium to large; roundish, oblong; golden yellow, with a rich crimson cheek, covered with a delicate white bloom; flesh yellow, crisp and when fully ripe, pleasant and agreeable; perfectly hardy.

Large Red Siberian—About an inch in diameter, grown in clusters; yellow, lively scarlet cheek. Tree erect, vigorous.

Hyslop—Almost as large as Early Strawberry Apple; deep crimson; very popular on account of its large size, beauty and hardiness. Keeps well into the Winter.

Personal Service is the Foundation of Our Success

Yes—Friendship, Good Faith, Sincerity and Personal Service do exist in business. They are the foundations of Pomona’s success.
Select Varieties of Peaches

Peach trees are easily cultivated, their comparative freedom from disease, the short period before they become productive, with the immense demand for the fruit and the facilities with which it may be shipped to distant markets, make peach growing extremely profitable, and there are few kinds of fruits more highly prized and more keenly relished.

To secure healthy, vigorous and fruitful trees, the ground must be kept clean and mellow and it should receive an occasional dressing of wood ashes. It should be remembered that peaches are all borne on wood of the previous season's growth, and that this makes it absolutely necessary to prune the trees yearly, to remove dead branches and let in light and air, and keep the trees in good shape to produce bearing wood.

Triumph—Earliest yellow-flesh peach, with good eating and shipping qualities, sure and abundant bearer; strong, vigorous grower.

Hill's Chili—Medium; deep yellow shaded with dark red. Hardy, vigorous and productive. Good market variety. First of Sept.

Kalamazoo—Large, golden yellow, with crimson cheek; flesh thick yellow, superb quality, small pit. Strong grower, early bearer, hardy and productive.

Salway—Large; deep yellow, red cheek. Flesh yellow, juicy. Oct.

Smock—Large size; light orange, yellow with red cheek. Flesh yellow, juicy and rich. Oct.

Yellow St. John—One of the best of the early yellow varieties. Of medium size, orange yellow with a red blush on sunny side.

Gold Drop—Medium size; hardy very productive, quality the best, early bearer. Last of Sept.

Wager—Medium, yellow, good quality. Tree hardy and productive. A profitable late variety. Last of Sept.

Hiley—A large, early, white Peach highly colored on sun-exposed side. A profitable commercial variety, very hardy in wood and bud.

Matthew's Beauty—Fruit large; ripens two weeks later than Elberta. Skin golden yellow, streaked with red; flesh yellow, firm, excellent flavor. Perfect freestone.

Reeves' Favorite—Yellow with beautiful red cheek. Tree fine and large; bears crop regularly.

Stump—Roundish, white, with bright red cheek; flesh white, juicy and good. Late. Sept.

Elberta—A valuable, large peach of good quality. The best orchard variety, and valuable also for planting in the garden. Elberta is harder in bud than many varieties, therefore a more uniform cropper. Elberta is large, yellow, with red cheek, juicy and high-flavored, flesh yellow; freestone. Season medium early, following quickly upon Early Crawford.

Champion—Tree and fruit buds extremely hardy—has stood eighteen degrees below zero and produced a full crop the following summer. The flavor is delicious, sweet, rich and juicy; skin creamy white with red cheek, strikingly handsome.

Crawford’s Late—Of large size; skin yellow or greenish yellow, with dull red cheek; flesh yellow. Tree vigorous; moderately productive; one of the finest late sorts. Last of Sept.

Fitzgerald—Fully equal to Crawford’s Early in size, quality and color, a very early bearer, hardy, succeeding in Canada and in Michigan perfectly; fruit large, brilliant yellow with red cheek; highest quality.

Carman—A very hardy peach, ripening at same time as Early Rivers, yet almost as large and fine as Elberta. Skin pale yellow with blush on sunny side; flesh white, tender, sweet and melting. Aug.

Early Rivers—Large; color creamy white, with a delicate pink cheek, flesh melting, with a remarkably rich, racy flavor. Middle of Aug.

Greensboro—A valuable early white peach. Much larger in size than Alexander, ripening about the same time. July.

Niagara Peach—One of the best medium early yellow peaches that has been introduced for many years past is the Niagara. It originated in Niagara county, New York, and has been grown there for about ten years past, but only in a small way, until very lately. The fruit of the Niagara peach is much like that of Early Crawford in appearance, being large, oval, yellow with brilliant red cheeks.

Foster—Large, deep orange red, becoming very dark red on the sunny side; flesh yellow, very rich and juicy.

Banner—Tree a good grower, exceedingly hardy in both wood and buds; bears young, is very productive. Fruit large; deep yellow with crimson cheek; flesh yellow, excellent quality, rich, firm; equal to any as a keeper and shipper. A profitable late market variety.

Crosby Frost-proof Peach—A fine, handsome, yellow peach, with remarkably small pit, that bears regular crops north of the peach belt. Quality delicious; season follows quickly after Early Crawford. Crosby is now so well known that it will be no experiment planting it.

Beer's Smock—Large, yellow, with red cheek; flesh yellow and of the very best quality for the season; a regular and enormous bearer, making it very desirable for market purposes. Ripens a few days later than Smock.

Crawford’s Early—A magnificent large yellow peach of good quality. Tree vigorous and prolific; its size, beauty and productiveness make it one of the most popular varieties. Season, early September. This valuable peach has long been a favorite for large size, beauty and quality of fruit.

Belle of Georgia—Large; white, with red cheek; flesh white, firm and of excellent flavor. Tree a rapid grower and very productive. Early July.

Rochester—Early, good size, yellow freestone of fine quality, ready for market the middle of August.

Crosby—A remarkably fine peach for the home use or market. Ripens just before Crawford’s Late. Middle of Sept.

Chair’s Choice—Deep yellow, with red cheek; flesh yellow and very firm. Oct.

Engle’s Mammoth—Large, round, suture slight; yellow with red cheek; flesh yellow, stone small, free; sweet, rich, juicy.

Quality Is Our First Consideration

The Price Is A Matter For Your Decision

Hale—Large, attractive, yellow flesh, fine grained and unusually solid. It is exceptionally valuable as a commercial Peach owing to its unusual keeping and shipping qualities.

Select Varieties of Standard Pear Trees

BARTLETT—The most dependable high quality Pear

Bartlett—Large, coloring when fully ripe to waxen yellow with red blush; juicy, melting, highly flavored. The tree bears early and abundantly. May be grown either as dwarf or standard, but succeeds best as standard. Aside from the fact that it bears early, regularly and abundantly, the Bartlett pear is justly popular on account of its size, beauty and excellence. When introduced to this country its name was lost. Since it was cultivated and discriminated by Enoch Bartlett, it became universally known as the Bartlett. Aug. and Sept.

Seckel—Small size; yellowish russet, with red cheek; flesh whitish, buttery, very juicy and melting. The richest and finest variety known and extensively planted all over the country. A prolific bearer. Sept. to Oct.

Special Wholesale Price for All Varieties of Standard Pear Trees

Largest Size, 2 Yr. Trees, 5½ to 7 Ft, XXX, 95c each, 10 for $9.00, 100 for $85.00.

Orchard Size, 2 Yr. Trees, 4½ to 5 Ft., XX, 85c each, 10 for $8.00, 100 for $75.00.

Largest Size, 1 Yr. Trees, 3½ Feet and Up, 75c each, 10 for $7.00, 100 for $65.00.

Smaller Size 1 Yr. Trees, 2½ to 3 Feet high, 60c each, 10 for $5.50, 100 for $50.00.
Clapp's Favorite—Large size; pale lemon yellow; flesh fine grained, juicy, melting, rich and buttery, earlier than Bartlett and resembling the Flemish Beauty in growth. It is equally hardy with Flemish Beauty; a good grower and productive. Very desirable in all sections, and especially so where other varieties fail. Care should be taken to pick the fruit at least ten days before it would ripen upon the tree. Aug. and Sept.

Anjou—For late fall and early winter use, there is no better variety. Quality Equal to Bartlett. A close second to Bartlett in public favor. Distributes its fruit well, and stands up under a load better than Bartlett. Equal in quality to Bartlett and holds up longer. Hardly so prolific as Bartlett, but usually higher in price and one of the most profitable sorts grown.

Beurre Clairgeau—Very large; light yellow, shaded with crimson and russet; an early and abundant bearer. Jan.

Howell—Large size; light-waxen yellow, sweet and melting; excellent quality; a strong and hardy grower and good bearer. Sept. to Oct.

Flemish Beauty—Large size; greenish yellow and brown; rich and juicy. An old and highly esteemed variety; a strong grower and a great bearer; hardy and desirable. Fruit almost covered with light russet, becoming reddish-brown when ripe. Large, beautiful, melting, sweet and rich.

Wilder—Handsome, melting, sweet, pleasant, with small core, fine grained, tender and juicy. Greenish yellow with brownish red cheeks. Aug.

Kieffer—A vigorous grower, an early and regular bearer and very productive, fruit large, rich yellow, tinged with red, somewhat russety, flesh white, buttery and juicy. A good canning pear. Oct.

Select Varieties of Sour Cherries

The Cherry grows best on gravelly soil, and there attains its highest perfection, but will do very well in almost any situation except a wet one. It is one of the most ornamental of all fruit trees which, with its delicious and refreshing fruit, makes it very desirable for planting near the dwelling, where beauty and shade, as well as fruit, are so desirable.

Montmorency Ordinaire—The most popular of hardy cherries for market and home use. This cherry is planted largely in all parts of the country. The fruit is in great demand by canning factories and others, and sells at fancy prices. Montmorency has been growing in popularity all over the country each year, so that it has been almost impossible to grow trees fast enough to keep up the demand. It is of large size, light red in color, stem rather short. The tree is very hardy and a vigorous grower. The trees bear fruit soon after planting.

Ostheime—Very hardy, fruit large and roundish. Flesh is liver colored, tender, juicy and almost sweet, although a sub-acid cherry. Quality good. Middle of July.

Olivet—A tree of this variety should be in every garden. The fruit is very large, has a shining deep red color; tender, mild sub-acid flavor. Finest table and canning cherry you can get. Ripens in June.

Wrapp—A Russian variety. One of the hardiest cherries, vigorous and productive, medium size, dark purple, fine quality and has produced annual crops at the northernmost limit.

English Morello—The most valuable late cherry. Easily grown, producing a heavy crop every year. Fruit dark red, quality good, with a rich, acid flavor; late. Tree very hardy, for extremely cold latitudes. Aug.

Early Richmond—One of the most valuable and popular cherries, unsurpassed for cooking purposes. It is the good old variety that yields such marvelous crops in the gardens. The most hardy of all varieties, unjured by the coldest winters. Tree slender in growth, with a roundish spreading head, exceedingly productive. Ripens through June.

May Duke—Large red; juicy and rich; an old excellent variety; vigorous, productive. June 15.

Louis Phillippe—Large dark red; flesh tender, mildly acid, good to best. Mid-July.

Select Varieties of Sweet Cherries

The fruit of which is heart-shaped with tender, sweet flesh and the trees rapid growers. With my experience in growing cherries I by all means urge every owner of a home with a little space to plant Sweet Cherry Trees. No fruit is more liked by members of the family than this delightful fruit when fresh picked, stewed or preserved.

Yellow Spanish—Large, pale yellow, with red cheek; firm, juicy and excellent, one of the best light colored cherries; productive. Last of June.

Rockport—Fruit large, heart-shaped; skin pale amber; sweet and excellent. July.

Royal Ann (Napoleon)—A valuable cherry of the largest size. Pale yellow, with bright red cheek; very firm, juicy and sweet; valuable for canning.

Black Heart (Black Ox Heart)—An old variety; deep black; flesh tender, juicy, sweet. July.

Windsor—Fruit large; liver colored, resembling the Elkhorn, ripening a few days after that variety; flesh remarkably firm, of fine quality. Tree hardy and prolific. Vigorous. Middle of July.

Napoleon Cherry—Fruit very large, oblong, pale yellow, with a bright red cheek in the sun. Flesh very hardy, brittle, reddish at stone, juicy, and sweet. Tree a vigorous and erect grower, very productive. Early in July.

Bing—One of the most delicious Sweet Cherries grown. Tree very hardy and vigorous with heavy foliage. It succeeds in the East better than most sweet varieties. Fruit is large, dark brown or black and of very fine quality.

Black Tartarian—Very large; bright purplish black; half tender; juicy, very rich. Tree a remarkably vigorous and erect grower, and an immense bearer. One of the most popular varieties in all parts of the country. Ripe last of June.

Lambert—A valuable Sweet Cherry of the largest size. Skin dark purplish red, almost jet-black when ripe. Flesh firm, rich and juicy. Tree hardy.
Select Varieties of Plums

The Plum does best on a strong, clay soil, where it grows the most thriftily, and as is the case with all other fruits, it is greatly benefited by thorough cultivation.

BURBANK—The Reliable Cropper

Burbank—The best and most profitable among growers for market; ripens 10 to 14 days after Abundance. Burbank is one of the best of Japan Plums. Unsurpassed for beauty and productiveness, as well as great hardness of tree, with a foliage so perfect as to contribute in an essential degree to its health. Fruit large, oval often a slight neck; skin reddish purple; flesh yellow, juicy and good.

Red June—Recommended as "by all odds the best Japanese Plum, ripening before Abundance." One of the vigorous, upright growers; productive; fair size, vermillion red; pleasant quality. Ripens a week before Abundance. Aug.

Wickson—Fruit remarkably handsome, very large, long, heart-shaped, color deep maroon red covered with white bloom; flesh firm and meaty, yellow, rich and aromatic; cling; pit small. Tree an upright vigorous grower. Excellent keeper and shipper, is being planted largely for market. Early Sept.

Before planting your orchard make sure that you have selected varieties which are adapted to your soil, climatic and market conditions. If you have any question or wish our advice in selections, we are glad to help you and will answer to the best of our ability.

European Varieties of Plums

**Abundance**—The popular plum. Tree thrifty, hardy and beautiful; fruit large, showy and good, richly perfumed. The editor of *The Rural New Yorker* writes: "From one little Abundance tree we picked ten pecks of fruit. The quality is excellent. When fully ripe they are full of juice. The flesh is tender, and there is mingled with the plum a peach flavor that is refreshing and agreeable." First of August.

**ABUNDANCE PLUM—Hardy and Productive**

**Beauty of Naples**—Size large, color greenish-yellow, flesh firm, juicy and very fine flavored. Sept.

**Hungarian Prune.** (Pond’s Seedling)—very large, dark red, juicy and sweet. Sept.

**Fellemborg.** A fine late prune; oval, purple; flesh juicy and delicious. Sept.

**German Prune**—A large, long oval variety, much esteemed for drying; color dark purple; of very agreeable flavor. Sept.

**Lombard**—A great favorite because it is a wonderful and early bearer and a hardy strong grower.

**Coe’s Golden Drop**—Large and handsome. Last of September.

**Grand Duke**—Fruit oval with a short neck. Skin dark, almost a darkish purple.

**Imperial Gage**—Fruit large, oval; skin pale green, flesh juicy, sweet, rich and excellent.

**Shipper’s Pride**—The fruit is of a large size, dark purple; excellent for canning and an unusually good shipper.

**Shropshire Damson**—An English variety of great merit for preserving. Large. Oct.

**Yellow Egg**—A large beautiful egg-shaped yellow plum. Last of Aug.

**Geuii**—Fruit large, roundish, oval; skin dark purple, covered with thick blue bloom; flesh yellow.

**General Hand**—Very large, oval; golden-yellow; juicy, sweet and good. First of Sept.

**Reine Claude**—A delicious greenish-yellow Plum, spotted with red. It is of the finest quality and the housewife’s ideal Plum for canning and preserving. Sept.

**Tatge**—Evidently a seedling of the Lombard. Is larger, more nearly round, darker color and finer quality.

**Pond’s Seedling**—Tree a vigorous grower and most abundant bearer. One of the most attractive in cultivation. Sept.

**York State Prune**—Originated in Dansville. Large size and resembles German Prune in shape and color. Small stone and very free. Very valuable for commercial planting.

**Niagara**—Unsurpassed for beauty and productivity as well as great hardiness of tree. Fruit large, oval often with a slight neck.

**Monarch**—It is roundish oval in shape and dark purplish blue in color.

**Moore’s Arctic**—A very abundant and early bearer. Fruit ripens first of September. This is a purplish-black Plum with a thin blue bloom; flesh greenish-yellow, juicy.

**Bradshaw**—This is a very large, dark violet red plum, very juicy and good. The quality of Bradshaw is very fine and is very popular wherever planted.
Select Varieties of Dwarf Pears
At Special Low Prices

Dwarf Pear Trees often bear the same year planted, and the trees occupy but little room in the garden. They can be planted very closely together and kept headed back. There is scarcely a city or town lot so small that room cannot be found for a few dwarf fruit trees. Their hardiness makes it possible for anybody, anywhere, to produce delicious fruits. I am confident that if any patrons were to spend hours choosing from local nurseries or the agent’s catalogues, they would not find an equal number of varieties that possessed more valuable features for the home or market than those offered in this list.

We offer the following list of superior varieties of Dwarf Pear Trees. These are about all the varieties that will succeed as Dwarf trees. (See description of these on other pages.)

Bartlett, Seckel, Clapp’s Favorite, Duchess, Anjou, Kieffer, Flemish Beauty and Wilder Early.

Select Varieties of Quince

The Quince is a fruit very useful for cooking, canning and preserving and should be more generally planted. It always brings good prices on the market. Very desirable in making preserves, as it imparts the fine quince flavor to any other fruit with which it is prepared. Quince Marmalade makes one of the finest preserves.

**Orange**—Large; roundish, of a bright golden yellow color. Flesh firm and tough until cooked, when it becomes tender, juicy and of excellent flavor. Tree has rather slender shoots and oval leaves; very productive. This is the variety most extensively cultivated for the fruit. Ripe in October.

**Rea** (Rea’s Mammoth)—A large and fine variety of the Orange Quince. Rich and aromatic, one of the largest and handsomest. Bears young. A strong grower and productive.

**Van Deman**—A strong grower, the hardiest, surest and youngest bearer. Fruit golden, big, fine flavored. Tree productive.

**Champion**—A good variety, but ripens rather late for some sections. One of the best for section not subject to early frosts.

**Meech’s Prolific**—A large, late ripening variety; one of the best.

**Missouri Mammoth**—Rich and aromatic, one of the largest and handsomest. Bears young and prolifically.

Selected Varieties of Apricots

Gibb—Tree hardy, grows symmetrical, productive; fruit medium, yellowish, subacid, juicy and rich; the best early variety, ripening last of June.

J. L. Budd—Tree a strong grower and profuse bearer, fruit large, white with red cheek; sweet juicy, with a sweet kernel, as fine flavored as an almond; the best late variety.

Harris—Equal in size and quality to the best cultivated, recommended for its hardiness and good bearing qualities. June 20th to July 1st.

Montagamet—Deep yellow, one of the best for preserving. Sub-acid and of good quality. Tree vigorous and productive.

St. Ambroise—One of the largest and finest apricots, ripening early in August.

Wholesale Price for all varieties of Apricot trees 2 to 3 feet high 60 cents each, 10 for $5.50, 3 to 4 feet high, 75 cents each, 10 for $7.00.

Select Varieties of Nut Trees

Chestnut American Sweet is adapted to a great portion of this country. It is valuable as a nut producing tree, timber and ornamental purposes.

Wholesale Price of 3 to 4 ft. trees, 95c each.

Chestnut Spanish—A handsome round-headed tree, producing abundantly, very large nuts that find a ready market.

Wholesale Price of Spanish Chestnut trees, 4 to 5 feet, $1.25 each.

Butternut—A fine native tree producing a large, longish nut, which is prized for its sweet, oily nutritious kernel.

Wholesale Price of Butternut trees, 4 to 6 feet, $1.25 each.

Pecans—This nut is very productive.

Wholesale Price, 3 to 4 feet, $1.25 each.

Walnut, English—A fine, lofty, growing tree, with handsome, spreading head; produces large crops of thin-shelled, delicious nuts which are always in demand at good prices. Every home garden should have one or more English Walnuts. Tree very hardy.

Wholesale Price, 3 to 4 feet, $1.50 each.

Walnut, Black—The common well-known Black Walnut, the wood of which is most beautiful and valuable. It is very productive in nuts, which are liked by many.

Wholesale Price, 4 to 6 feet, $1.25 each.

Select Varieties of Dwarf Apples

Like Dwarf Pear Trees they come into bearing much earlier than Standard Trees. Their low broad heads are within reach, so that apples or pears can be easily picked. You can plant your garden full of dwarf fruit trees and still grow strawberries and vegetables. With dwarfs some varieties will bear the second year, and will bear a full crop the fourth year. While more dwarf trees can be planted upon an acre, and larger fruit can be produced, still they have not found favor among commercial orchardists except in a few sections where an extra high grade fruit is desirable. Dwarf trees are secured by propagating upon a slow growing root.

We can supply the following varieties:

Yellow Transparent, Gravenstein, Baldwin, McIntosh, Alexander, Duchess, Grimes' Golden, Yellow Belleflower, Twenty Ounce, Delicious, Wagener, Jonathan, Wealthy, Opalescent, Red Astrachan.

Cultivation—See that the ground is well drained, naturally or otherwise, work it up fine and deep and make it very rich with well rotted barnyard manure. Locate the plants eight inches apart in rows three feet apart. Spread out the roots in a trench made deep enough to permit their crowns to be covered with three or four inches of mellow earth. Give the bed liberal dressings of manure at intervals, and except near the sea-shore, three pounds of salt per square yard early every spring. Do not cut for use until the plants have grown two seasons.

Palmetto—Until recently we believed that Conover's Colossal was the best sort known, but we are now forced to concede that the Palmetto is earlier and a better yielde r, and more even and better in growth, and that it will eventually supersede the old favorite. The average bunches contain 155 shoots, measuring thirteen and one-half inches in circumference, weighing nearly two pounds. It has been tested both north and south, and has proved entirely successful in every instance.

Donald's Elmira—This is a new variety which is attracting much attention from all lovers of asparagus. It originated at Elmira, N. Y., hence its name. It realizes the best prices in the market, and the supply has never half equalled the demand. The delicate green color is noticeably different from either the famous Barr's Philadelphia Mammoth or Palmetto, while the stalks are more tender and succulent.

Barr's Mammoth—This is the finest asparagus ever offered for sale, being much larger and earlier than any other. The stalks are very large, tender, and of light color.

Conover's Colossal—This variety is much superior in size and quality to any other, being remarkably tender and fine flavored.

Columbian Mammoth White—A distinct variety of strong, vigorous growth, producing very large, white shoots, that in favorable weather remain white as long as fit to use. Market gardeners and those growing for canners will find this a very profitable variety.

Giant Argenteuil—A French variety introduced several years ago, is proving the finest and most profitable. Stalks mammoth size, bright, attractive color, sweet and tender. It is an immense yielder and very early, makes beds strong enough for profitable cutting before any other variety.

Wholesale Price for all varieties of Asparagus named on this page, strong 2 year roots, 25 for 85 cents, 50 for $1.50, 100 for $2.50, 1000 for $15.00.

Rhubarb

This deserves to be ranked among the best early products of the garden. It affords the earliest material for fine pies and fresh table sauce, continues long in use, and is valuable for canning. Make the ground rich and deep, and thus secure a more tender growth.

Early Scarlet—Rather small, but early and good.

Myatt's Linnaeus—Large, early, tender and fine. The very best of all.

Wholesale Price of Rhubarb, strong 2 year roots, 20 cents each, 10 for $1.75, 100 for $12.00
Select Varieties of Grapes At Reduced Prices

Grapes are planted anywhere and everywhere—to trail over the sides of houses, on arbors, sheltering paths, fences, etc.; even people who live in the crowded parts of cities may have them.

SPECIAL REDUCED PRICE ON CONCORD GRAPE VINES

Concord—Bunch large, shouldered, compact; berries large, covered with a rich bloom. Vine a strong grower, very hardy. The best for making grape juice and wine.

Special Price on Concord Grape Vines
Selected Two Year Vines 25c each, 10 for $2.25, 100 for $17.50
Grapes are planted anywhere and everywhere—to trail over the sides of houses, on arbors, sheltering paths, fences, etc.; even people who live in the crowded parts of cities may have them.

**Diamond White**—The leading early white grape, ripening before Moore’s Early. White, with rich yellow tinge; juicy, few seeds, almost free from pulp, excellent quality; above medium size, adheres firmly to stem.

**Chas. A. Green White**—Claimed by the introducer to be a new and valuable variety, a vigorous grower and an enormous yielder of very large and beautiful clusters of excellent fruit.

**McPike**—This mammoth black grape has been exhibited in all parts of the country, its great size, fine flavor and beauty creating quite a sensation. The bunches are large, even and compact.

**Brighton**—Perhaps the best red grape in cultivation. Bunch large, compact; strong grower and very productive; quality good.

**Niagara White**—Occupies the same position among the white varieties as Concord among the black; the leading profitable market sort. Bunch and berries large, greenish white changing to pale yellow when fully ripe.

**Campbell’s Early** (Black)—Strong grower, with large, healthy foliage; productive, its keeping and shipping qualities are equalled by no other early grape.

**Moore’s Early** (Black)—Bunch and berry large, round with heavy blue bloom; vine exceedingly hardy. Its earliness makes it desirable for an early market.

**Agawam (Roger’s No. 15)** (Red)—Berries very large, thick skin, pulp soft, sweet, sprightly, very vigorous, ripens early.

**Diamond**—Leading early white grape, ripening before Moore’s Early.

**Pocklington**—One of the largest and most showy white grapes of the Concord type.

**Catawba**—Berries large, round; when fully ripe of a dark copper color.

**Lindley (Roger’s No. 9)**—Berries medium to large; flesh tender, sweet and aromatic; ripens early.

**Salem (Roger’s No. 53)**—Bunch large, compact; berry large, round, coppery red, tender, juicy. Ripens with Concord.

**Delaware**—Red, finest flavor. Bunch and berry small, compact; sweet, thin skin; slow grower; requires good soil.

---

**There’s More in Business**

Than dollars and profit. We would rather make a friend than two sales.

**Special Price on all Varieties of Grapes**

(Except Concord)

Selected 2 Year Vines, 30c each; 10 for $2.75; 100 for $25.00
RASPBERRIES

Will do well on any soil that will produce a good corn crop. Land should be thoroughly prepared and well enriched; ground bone is one of the best fertilizers. Keep well cultivated and free from weeds and suckers. As soon as they have done bearing, cut out the old wood to give more vigor to the young canes. Plant in rows five feet apart, three feet apart in rows.

Red Varieties

St. Regis Everbearing—A wonderful new variety of Red Raspberry, bears fruit the first season, bears for four months beginning about June fifteenth. The second crop of berries is borne on the ends of the new canes and ripens about the middle of August and continues until frost.

Cuthbert—Large, conical; deep rich crimson; firm, of excellent quality. Vigorous grower, entirely hardy and immensely productive. The best raspberry for general culture.

Marlboro—The best early red raspberry. Hardy and productive.

London—Ripens with the earliest and hangs to the last. Immensely productive and a fine shipper. Very hardy and does not sucker nearly so much as other red raspberries.

Purple Varieties

Columbian—Very large, often an inch in diameter; adheres firmly to stem and will dry on the bush if not picked.

Black Varieties

Black Diamond—One of the best for home and market use. For drying and evaporating it excels all others. The fruit is large and handsome.

Cumberland—Plants vigorous, hardy and productive; fruit large. Mid-season.

Gregg—Plants vigorous, hardy and productive; fruit above medium to very large.

Kansas—Largest size, strong, vigorous grower, hardy bearing immense crops. Size of Gregg.

Plum Farmer—Berry large and very productive, a great favorite in Western New York. A fine picker and one of the best market sorts.

Ohio—A very strong growing hardy sort; fruit nearly as large as Mammoth Cluster; more productive.

Wholesale Price for all varieties of Raspberries by express, Strong Plants, 10 for $1.00, 25 for $1.50, 100 for $5.00, 1000 for $25.00

KANSAS BLACK RASPBERRY

Wholesale Price for all varieties of Raspberries by express, Strong Plants, 10 for $1.00, 25 for $1.50, 100 for $5.00, 1000 for $25.00
Propagated Where the Best Trees Grow

Select Varieties of Blackberries

This profitable fruit should be planted for garden use in rows five feet apart, with plants three feet apart in rows; for market, in rows six feet apart, with plants three feet apart in the rows. Give the plants the same cultivation as for raspberries.

**THE HARDY ELDORADO BLACKBERRY**

**Eldorado**—The best all-round berry yet produced, combining nearly all the good qualities found in a blackberry. The vines are very hardy and vigorous, enduring the winters of the far Northwest without injury, and their yield is enormous. The berries are large, jet black, borne in large clusters and ripen well together; they are very sweet, melting, have no hard core and keep for eight or ten days after picking with quality unimpaired.

**Snyder**—Extremely hardy; enormously productive; medium size.

**Wilson's Early**—Large size, black, quite firm, rich, sweet and good. Ripens early and matures its fruit rapidly.

**Minniewaska**—Wonderful, hardy, productive, good blackberry, has not been forgotten by us, or our old patrons. Its principal points are hardiness, excellent quality, earliness, and continued bearing and productiveness. The secret of its great productiveness, is that it is an enormous grower. A large grower near Rochester states that his average receipts from an acre of Minniewaska blackberries has been $300 per year for the past five years.

**Early Harvest**—The earliest blackberry and valuable for market. The canes are strong and upright in growth and enormously productive. Berries sweet and of the highest quality.

**Erie**—Bush vigorous; berry large, round; good quality; early and productive.

**Agawam**—Ripens earlier than other kinds, and has a flavor similar and equal to the wild berry. Very hardy.

**Ancient Briton**—Bush hardy and very productive. One of the best old sorts, and still grown in immense quantities by successful market gardeners.

**Blower**—Large size, jet black, good shipper, best quality, unexcelled productiveness are the main characteristics of this splendid new sort.

**Rathbun**—Bush perfectly healthy, vigorous, but not a high growing sort; very rarely suckers from the roots. Fruit of largest size, highest quality, borne in great profusion.

**Lawton**—Very large, excellent quality, and an abundant bearer.

**Kittatinny**—At one time this was the most popular of all Blackberries. It is still first-rate for garden use, and in some localities for market. Berries large; canes strong in growth; productive.

**Ward**—A new Blackberry of great merit. A seedling of Kattatinny, which it resembles somewhat, having the good qualities of its parent and none of the defects. A very strong grower; it is perfectly hardy at its home in New Jersey. The fruit is black throughout and very prolific, firm and good for shipment.

Wholesale Price for all varieties of Blackberries (by express) Strong Plants, 10 for $1.00. 25 for $2.00, 100 for $5.25, 1000 for $37.50.
Gooseberries

Plant in good rich soil and give a liberal dressing of manure every season. Regular pruning every year is essential for the production of fine fruit. The English varieties especially do best in partial shade and should be heavily mulched.

Downing—Large, handsome pale green, and of splendid quality for both cooking and table use; bush a vigorous grower. 2 Year Bushes 50 cents, 10 for $4.50.

Houghton's—Small to medium; roundish, oval, pale, sweet, tender, very good; plants spreading; shoots slender. 2 Year Bushes 45 cents each, 10 for $4.00.

Josselyn—Large size, smooth, prolific and hardy, of best quality. Have been tested over a wide extent of territory by the side of all the leading varieties, and so far is the freest from mildew. 2 Year Bushes 50 cents each, 10 for $4.50.

Red Jacket—A new red berry of large size and good quality; hardy and very productive. 2 Year Bushes 50 cents each, 10 for $4.50.

Columbus—Fruit of largest size, oval, handsome, a greenish yellow, finest quality. Plant's a strong, robust grower, free from mildew. 2 Year Bushes 50 cents each, 10 for $4.50.

Due to a Federal Quarantine, we can only ship to the following states Currant and Gooseberry Bushes: Connecticut, Illinois, Indiana, Massachusetts, Michigan, New Jersey, Ohio, New York and Pennsylvania.

Select Varieties of Currants

The Currant is one of the most productive and best paying small fruit that we have. There is, we believe, more profit to the acre in currants than any other small fruit.

Cherry (Red)—Very large; deep red; bunches short. Plants erect, stout, vigorous and productive.

Fay's Prolific (Red)—A cross between Cherry and Victoria. Of large size, fine flavor, and claimed to be twice as prolific as the Cherry.

Red Cross—A strong growing variety. Cluster long; berry medium to large, bright red; quality good to best. Very productive.

Wholesale Price for all Varieties of Currants, 2 Year Bushes 35 cents each, 10 for $3.00, 100 for $25.00.
Select Varieties of Strawberries

The Strawberry delights in good, rich, moist soil, but will grow on any soil which is capable of raising good general crops. By planting early, medium and late varieties, the grower is supplied with fruit during the entire strawberry season. In hill culture plant 15 inches apart each way, in beds 4 feet wide, with alleys of 2 feet between. For matted rows, plant 1 foot apart in rows 4 to 5 feet apart, for varieties which make plants freely; for other varieties, 3 feet apart will answer.

We pack all Strawberries in baskets containing about 1,000 plants each, in damp moss, a much superior way to packing them in large, tight boxes. Their freshness upon arrival at destination is surprising.

NOTE: Do not order strawberry plants sent by freight. My patrons order from 50 to 500 trees, and 500 or more strawberry plants by freight. Now the trees should go by freight and the strawberries by express, or small lots by mail. In all cases when desired by mail, add postage at rate of 20c per 100. Always state plainly that the strawberry plants are to be sent by express or mail.

Senator Dunlap—A well tested, early variety, one of the safe sorts to plant everywhere. Fruit good size, regular form, beautiful bright red, glossy, firm, splendid keeper and shipper, excellent quality, one of the best for canning.

Jessie—Large, handsome, roundish conical; firm; good quality. Plant vigorous and productive. One of the best for home market. Season early to medium.

Sharpless—This grand old sort originated in Pennsylvania, and has been planted everywhere with very satisfactory results. Fruit large size, showy and good. Season medium.

Wilson's Albany—The old standard sort for preserving and canning.

Haverland—Large long, bright red; a great yielder. One of the best of recent introduction.

GlenMary—An exceedingly attractive berry, as large as the Sharpless. Color a bright glossy crimson, and so handsome that it brings the highest prices in market; moderately firm, and fine in flavor. The plant is vigorous, healthy and very productive, and the berries maintain their large size until the close of the season.

Brandywine—A very late and firm berry; a good shipper, good canner, a good all around strawberry. Season medium to very late.

McKinley—Medium to late. Fruit large and firm, of round, conical shape and bright red color which extends clear through the meat.

CORSICAN

Corsican—Is a great strawberry for many reasons. First, it is the biggest berry; second, it is the brightest and best in color; third, it is a great yielder, and producer; fourth, and the most important of all, the foliage is exceedingly vigorous and leathery.

Marshall—An extra large and handsome berry of a high color and fine quality, ripening very early. Plants strong, with high culture produces heavy crops.

Sample—Late, of large size and yields enormous quantities of high quality bright red berries. A standard shipping variety.

Special Wholesale Price for all varieties of Strawberries, (except Fall Bearing,) (by express) 25 for $1.00, 100 for $1.75, 1,000 for $12.00. By mail postpaid, 25 for $1.00, 100 for $1.95.

FALL BEARING VARIETIES—Americus and Productive, by express, 25 for $1.25, 100 for $3.50. By mail postpaid, 25 for $1.45, 100 for $3.75.
Ornamental Trees

While most people appreciate well arranged and well kept grounds, large or small, many fail to realize that they can have equally fine grounds. We frequently observe a few shrubs or roses growing in thick turf, with no attention given to pruning or cultivation. Under such circumstances good results cannot be expected.

Aside from the pleasure of having fine trees, shrubs, vines and flowers in the grounds surrounding a home, few realize how much these add to the commercial value of the place. A purchaser having to decide between a house with bare and unkept grounds and one surrounded by fine ornaments, invariably chooses the latter at a marked advance in price, because he sees that he will at once enjoy what it would otherwise take some years to secure. Sagacious men are led by a knowledge of these facts to plant fine trees and shrubs about vacant lots that they are intending to put upon the market. Lots thus planted readily secure purchasers at good prices when bare grounds go begging for buyers.

Cut-Leaved Weeping Birch—The most popular of the weeping trees, its tall, slender, yet vigorous growth, graceful branches, silvery white bark, and delicately cut foliage, present a combination of attractive characteristics rarely met with in a single tree.

Price of Cut-Leaved Weeping Birch, 5 to 6 feet, $2.50 each, 3 to 5 feet $2.00 each.

Camperdown Weeping Elm—A vigorous grower and forms one of the most picturesque drooping trees. Leaves large, dark green and glossy and cover the tree with a luxuriant mass of verdure; very desirable.

Wholesale price of Camperdown Weeping Elm, $3.00 each.

Catalpa Bungei (Umbrella Catalpa)—Grafted one stems six to eight feet high, it makes an umbrella-shaped top without pruning. Perfectly hardy, and flourishes in almost all soils and climates.

Wholesale price for Catalpa Bungei trees, 6 to 8 feet, $2.00 each, 5 to 6 feet, $1.75 each.

Hardy Tree Hydrangea—It forms a graceful and dwarfish tree, not reaching more than eight to ten feet in height, and is extremely effective for lawn decoration, whether standing singly or in masses. The immense trusses of bloom appear at just the time when other flowers are scarce, and last from the first of August until frost comes. It is entirely hardy and very easy to grow.

Wholesale price of Tree Hydrangea, 3 to 4 feet $1.25 each, 2 to 3 feet $1.00 each.

Horse Chestnut (White Flowering)—Very handsome; has magnificent spikes of white flowers. As a lawn tree or for the street it has no superior.

Price of Horse Chestnut trees 4 to 5 feet, $1.25 each, 5 to 6 feet $1.50 each.

American Elm—The most admired of all American trees. It is very attractive in any suitable location, is entirely hardy and easily transplanted. There are more Elm trees planted along our streets and highways than any other one variety. This is on account of its dense green foliage, which spreads out from overhead, covering a suitable space of ground in proportion to the size of the tree, which makes it the finest shade tree in the world. We have a large stock of these handsome and most beautiful trees.

Wholesale price of American Elm: First class trees, 6 to 8 feet high, $1.00 each, 10 for $9.00, 8 to 10 feet high, $1.25 each, 10 for $10.50.
SILVER-LEAVED MAPLE

Maple Silver-Leaved (A. dasycarpum)—One of the most ornamental of the species; the under surface of the leaves a soft white. It is exceedingly rapid in its growth, often making shoots six feet long in a season; valuable as a street tree.

Price of Silver-Leaved Maple, 8 to 10 feet $1.00 each, 10 for $9.00, 6 to 8 feet 35 cents each, 100 for $7.00.

Maple Ash-Leaved (Negundo fraxinfolium)—A fine, rapid growing variety with handsome, light green, pinnated foliage and spreading head. Very hardy.

Price of Ash-Leaved Maple trees, 6 to 8 feet $1.00 each, 10 for $8.00, 5 to 6 feet 75 cents each, 10 for $7.00.

Maple Wier's Cut-Leaved (weirii Laciniatum)—A Silver Maple with remarkable and beautiful dissected foliage. Of rapid growth; shoots slender and drooping, giving it a very graceful appearance. Should be in every collection. While it makes a large tree if undisturbed, it will bear any amount of pruning and may be easily adapted to small lawns.

Price of Wier's Cut-Leaved Maple trees, 6 to 8 feet $1.10 each, 4 to 6 feet 90 cents each.

Maple Norway (Plantanoides)—One of the hardiest ornamental shade trees, and one of the most beautiful.

Price of Norway trees, 8 to 10 feet, $2.00 each, 10 for $18.00, 6 to 8 feet $1.50 each, 10 for $14.50.

Sugar or Rock Maple (Saccharinum)—This native tree of ours is a universal favorite for street planting, and desirable everywhere. This tree is chieftain of its clan, straight, spreading symmetrical, of grand proportions, often 120 feet in height, and longer-lived than most men who plant it. It grows well in all except damp, soggy soils, and roots deeply, allowing the grass to grow close about its trunk.

Price of Sugar Maple trees, 8 to 10 feet, $1.75 each, 10 for $15.00, 6 to 8 feet $1.50 each, 10 for $14.50.
Ornamental Trees

**Poplar Carolina** (Populus)—Pyramidal in form and robust in growth; leaves large, pale to deep green. This is undoubtedly a grand tree for street planting or lawn, where a quick shade is wanted. If the leaders are kept pruned back the first two or three years, will make well shaped, round heads with dense shade. Trees are healthy, robust growers.

**Wholesale prices for Carolina Poplar trees:**
- 10 to 12 feet high: 75 cents each, 10 for $5.50, 100 for $37.50.
- 8 to 10 feet high: 65 cents each, 10 for $4.50, 100 for $27.50.
- 6 to 8 feet high: 50 cents each, 10 for $4.00, 100 for $22.50.

**Lombardy Poplar**—This is an old favorite. Well known and remarkable for its erect, rapid growth, and tall, spiral form. Indispensable in landscape gardening, to break the ordinary and monotonous outlines of most other trees.

**Wholesale price for Lombardy Poplar Trees:**
- 8 to 10 feet: 75 cents each, 10 for $4.50, 100 for $37.50.
- 6 to 8 feet: 65 cents each, 10 for $5.00, 100 for $32.50.

**Tulip Tree** (Whitewood)—One of the grandest of our native trees, of tall, pyramidal habit, with broad, glossy, fiddle-shaped leaves and beautiful, tulip-like flowers; allied to the Magnolia.

**Thorn Double Scarlet** (Coccinea fl. pl.)—Flowers deep crimson with scarlet shade; very double and considered larger than the double red; fine, rich foliage.

**Thorn Double White** (Alba flore pleno)—Has small, double, white flowers.

**Wholesale price for all varieties of Double Flowering Thorn:**
- 4 to 5 feet: $1.75 each, 10 for $15.00.

**Bechtel's Flowering Crab**—Makes a medium sized tree; perfectly hardy, succeeds well in all soils not extremely wet. When in bloom appears to be covered with delicate pink, perfectly double small roses of delicious fragrance.

**Price:** 3 to 4 feet, $1.35 each.

Select Varieties of Upright Flowering Shrubs

Double Flowering Althea (Rose of Sharon)—One of the most showy flowering shrubs; strong, erect growing, with large bell-shaped, double flowers of striking color, borne abundantly in August and September when most other shrubs are out of bloom. I offer them in the three colors all being double blossoms.

Double Red—(Rubra flore pleno.)
Double Purple—(Purpurea flore pleno.)
Double White—(Alba flore pleno.)

Calyxanthus (Sweet Scented Shrubs)—Flowers purple, very double and deliciously fragrant; remains in bloom for a long time; very desirable.

Prunus Pissardi (Purple-Leaved Plum)—The finest purple-leaved small tree or shrub. The young branches are a very dark purple; the leaves when young are lustrous crimson, changing to a dark purple, and retain this beautiful tint till they drop late in autumn; no other purple-leaved tree or shrub retains its color like this.

Wholesale price for all varieties of Flowering Shrubs named above: Large size, 2 to 3 feet, 50 cents each, 10 for $4.50.

Upright Honey Suckle Tartarian (White)—Pure white flowers followed by deep red berries, that fill the bush till autumn, very attractive.

Upright Honey Suckle Tartarian (Pink)—Pink flowers which contrast beautifully with the foliage.

Snowball Common (V. opulus)—A well known favorite shrub of large size, with globular clusters of pure white flowers in the latter part of May.

Snowball Japanese (Viburnum Plicatum)—From North China; has very rich deep green foliage, of handsome form and beautiful globular heads of pure white flowers, quite distinct from those of the common sort.

Syringa—European Fragrant or "Mock Orange" (Philadephia Coronarius)—A well-known very hardy shrub, with showy white flowers which are very fragrant.

Syringa Golden-Leaved (P. Folis Aureis)—A beautiful new variety with bright yellow foliage, which affords pretty contrasts with other shrubs, especially with the purple-leaved variety.

Quince, Japan Scarlet (Cydonia)—Has bright scarlet crimson flowers in great profusion, early spring; one of the best hardy shrubs; makes a beautiful, ornamental hedge.

Prunus Triloba (Double Flowering Plum)—A highly interesting and desirable addition to hardy shrubs; flowers semi-double, of a delicate pink, upwards of an inch in diameter, thickly set on the long slender branches; native of China; hardy.

Fringe Purple, or Smoke Tree—A very elegant and ornamental large shrub, with curious, hair-like flowers which, being a pinkish brown color, gives it the names "Purple Fringe" and "Smoke Tree." The blossoms are in July, sometimes literally covering the tree and remaining all summer.
SPIRAEAS

A class of low, compact, easily grown flowering shrubs, vigorous and hardy as a class, with blossom periods extending over a wide range of seasons. We offer the following varieties:

Spiraea Anthony Waterer—This beautiful variety has the same habits as its parent, the Blumalda. It blooms about the close of June, continuing throughout the entire season. It is useful for edging, planting in masses, or as a single specimen where a low, bushy shrub is required.

Spiraea Billardi (Billiard’s Spiraea)—Rose colored, blooms nearly all summer.

Spiraea Blumalda—New, and considered one of the finest of this class. Flowers brilliant pink, with variegated foliage.

Spiraea Bloomii—A charming bush that has large panicles of deep, rose-colored flowers. June and July.

Spiraea Callosa Alba—A white flowering variety of dwarf habit; very fine, remains in flower all summer.

Spiraea Van Houttei (S. Van Houttei)—The most showy of all the Spiraeas, and one of the very best flowering shrubs in cultivation. The plant is a rather tall, upright grower, with long slender branches that droop gracefully with their weight of foliage and flowers. Flowers pure white, in great clusters and whorls, forming cylindrical plumes two or three feet long. This is one of the hardiest of all the Spiraeas.

Spiraea Thunbergii (Thun. Berg’s Spirae D.)—Of dwarf habit and rounded, graceful form; branches slender and somewhat drooping; foliage narrow and yellowish green; flowers small, white.

WEIGELAS

Shrubs of erect habit while young, but gradually spreading and drooping as they acquire age. They produce in June and July superb large, trumpet-shaped flowers of all shades and colors, from pure white to red. In borders and groups of trees they are very effective, and for margins the variegated-leaved varieties are admirably suited, their gay-colored foliage contrasting finely with the green of other shrubs.

Weigela Candida (White-flowered Weigela)—Of vigorous habit, an erect grower, becoming in time a large sized shrub; flowers pure white and produced in great profusion in June, and the plants continue to bloom through the summer, even until autumn.

Weigela Eva Rathke—Flowers brilliant crimson; a beautiful, distinct, clear shade.

Weigela Rosea (Rose-colored Weigela)—An elegant shrub, with fine rose-colored flowers; of erect, compact growth; blossoms in June.

Weigela Florabunda (Crimson Weigela)—The flowers are dark crimson, with white stamens projecting from them, reminding one somewhat of Fuschia flowers. It blooms in the spring with other Weigelas, but if plants are topped off after young growth has been made, they bloom profusely in the fall. One of the best.

Weigela Variegated-Leaved (Fol. Variegated)—Leaves bordered with yellowish white, finely marked, flowers bright pink.

Wholesale price for all varieties of Flowering Shrubs named above: Large size, 2 to 3 feet, 50 cents each, 10 for $4.50.
A HEDGE OF HARDY BUSH HYDRANGEA

Hardy Bush Hydrangea (Paniculata Grandiflora)—We urge our friends to plant the Hydrangea. Plant it for the following reasons: It is hardy, enduring the severest winters out doors without protection. It is easily transplanted, not one in a thousand dying. It never fails to blossom the first year planted; no matter how small the plant, it immediately buds out in great profusion of flowers, many of them as large as the head of a full grown child. When the specimens first open they are greenish white, later they turn to a pure white, and still later to a delicate pink. The Hydrangea should be cut back at least one-half of each season's growth in order to get the largest specimens. To get the best results, make the soil rich, it will grow anywhere and in any soil.

DEUTZIA

This valuable species of plants comes to us from Japan. Their hardiness, luxuriant foliage and profusion of attractive flowers, render them deservedly among the most popular of flowering shrubs. The flowers are produced in June in racemes four to six inches long.

Deutzia Double Flowering (Crenata)—Flowers double white, tinged with rose. One of the most desirable flowering shrubs in cultivation.

Deutzia Pride of Rochester—A new variety raised from Deutzia Crenata, and exceeding all others in size of flowers, length of panicles, profuseness of bloom and vigorous habit; a charming acquisition to the list of Deutzias.

Deutzia Slender Branched (Gracilis)—A charming variety introduced by Dr. Siebold. Flowers pure white and so delicate that they are very desirable for decorative purposes.

DEUTZIA, PRIDE OF ROCHESTER

Deutzia Lemoinei—Flowers pure white, borne on stout branches of upright growth. Dwarf and free flowering, much prized for cemetery planting and in front of taller shrubbery.

LILACS

Best beloved of all the old time garden shrubs; whose flowers never fail to charm with their delicate beauty or refresh the soul with their tender fragrance. New varieties are occasionally produced, with deeper coloring and larger form, so that our lists present a wide and varied offering.

Lilac, Purple—The well-known variety, one of the best. A good grower; flowers and young wood fragrant; purple.

Lilac, White—A very desirable contrast to the purple; those who have one should have the other.

PURPLE LILAC

Wholesale price for all varieties of Flowering Shrubs named above: Large size, 2 to 3 feet, 50 cents each, 10 for $4.50.
Golden Leaved Elder—The best of all the colored shrubs. A plant of this bush in a bed, or on a border, or on the lawn, is a conspicuous feature, the foliage being as yellow as gold.

Eleagnus Longipes (Janpan Oleastre)—A showy shrub of strong, bushy growth, with silver variegation in the lining of its leaves, which are dark green above. Its fragrant, creamy white blossoms open in April or May; the scarlet, edible fruits hang thickly along its branches and are ripe in July.

Viburnum Opulus (High Bush Cranberry)—Handsome, dense, brilliant green foliage; a rich setting of large bunches of crimson berries which enliven the late summer and persist on bare branches in the winter.

Calycanthus (Carolina Allspice)—A unique shrub of quick growth, blossoming oddly at the leaf axils in double, spicily fragrant flowers of chocolate red.

Wholesale price for all varieties of Flowering Shrubs named above: Large size, 50 cents each, 10 for $4.50.

Hardy Climbing Vines

Hallena (Hall's Japan Honeysuckle.) An almost evergreen honeysuckle of the greatest value, being hardy and of strong growth. The flowers are fragrant, of a pure white, changing to yellow.

Price of strong 2 year plants, 50 cents each, 10 for $4.50.

Ampelopsis Veitchi (Boston Ivy.)—This is one of the finest climbers we have for covering walls, as it clings firmly to the smoothest surface, covering it closely with overlapping foliage, giving it the appearance of being shingled with green leaves.

Price of strong 2 year plants, 50 cents each, 10 for $4.50.

Henryii Clematis—A vigorous grower and a free bloomer, producing its large pure white flowers constantly during the summer and early autumn. The best large-flowered variety producing pure white flowers.

Price for strong 2 year plants, 95 cents each, 10 for $9.00.

Jackmanni Clematis—The flowers are large, intense, rich, velvety violet-purple, and are produced in such masses as to form a cloud of bloom. This is the best known Clematis, and should have credit of the great popularity now attending this family of beautiful climbers. The Jackmanni has no superior and few equals.

Price for strong 2 year plants, 95 cents each, 10 for $9.00.

Paniculata Clematis (Sweet-scented Japan Clematis)—Of very rapid growth, quickly covering trellises and arbors with handsome, clean, glossy foliage. The flowers are of medium size, fragrant, pure white, borne in immense sheets in September, when very few other vines are in bloom.

Price for strong 2 year plants, 50 cents each, 10 for $4.50.

42
Evergreens

**Spruce Norway**—A lofty, elegant tree of perfect pyramidal habit, remarkably elegant and rich, and as it gets age has fine, pendulous graceful branches; it is exceedingly picturesque and beautiful. Very popular, and deservedly so, and should be largely planted.

*Price of Norway Spruce*
- 18 to 24 inches, 75 cents each, 10 for $7.00, 100 for $50.00.
- 2 to 3 feet, $1.00 each, 10 for $9.00.

**Arbor Vitae American**—This is one of the very finest evergreens for hedges. It is very hardy, and if set at the proper time with care and without undue exposure, it may be relied upon to live.

*Price, 18 to 24 inches, 75 cents each, 10 for $7.00.*

**Juniper Irish**—Very erect and tapering in its growth, forming a column of deep green foliage; a pretty little tree or shrub, and for its beauty and hardiness is a general favorite.

*Price of Irish Juniper, 2 to 3 feet, $1.50 each.*

Hedge Plants

**California Privet**—A vigorous-growing variety, of fine habit, thick, glossy, nearly evergreen leaves. Of all ornamental hedge plants this is the most highly prized. If cut to the ground one or two years after planting, it makes a very thick hedge right from the bottom, sending up many strong shoots.

*Wholesale price of California Privet, strong 2 year plants, well branched,*
- 18 to 24 inches high, 15 cents each, 10 for $1.25, 100 for $8.00, 1000 for $75.00.
- 2 to 3 feet high, 25 cents each, 10 for $1.50, 100 for $10.00, 1000 for $90.00.

**Barberry Thumbergii**—From Japan. A beautiful shrub of dwarf habit, not growing more than three feet high; covered with yellow flowers, followed by scarlet fruits on long stems that last nearly all winter.

*Wholesale price of Barberry Thumbergii plants, 18 to 24 inches, well branched, 45 cents each, 10 for $4.00, 100 for $35.00. 12 to 15 inches, well branched, 35 cents each, 10 for $3.25, 100 for $30.00.*

CALIFORNIA PRIVET

Complete List of Ornamental Hedge Plants
Select Varieties of Hardy Roses

Frau Karl Druschki—A pure paper white, large sized and free flowering. It is a remarkably handsome plant with bright, heavy foliage and strong upright growth. The bloom is perfect in form on fine, long stems, and of the purest possible white. There is nothing in the line of perfectly hardy Roses that can compare with this one in form.

Mrs. J. Laing—Very free flowering; commences early and continues to bloom profusely until fall. Of delicate pink color. Very fragrant.

La France—Rich satiny peach, changing to deep rose; large and full. A constant bloomer. The sweetest of all.

Magna Charta—Pink and carmine; very large and full; a profuse bloomer. Fragrant.

General Jacqueminot—Brilliant crimson, large and very fine; one of the handsomest and most showy roses of this color. Beautiful in the bud; semi-double when full blown. Of fine free growth.

Live Forever Rose—We recommend this rose to all, especially to those who have not been able to succeed with roses. Plant it in large beds and you will have a display of bloom that will attract attention and admiration. Plant it in the form of a hedge-row and you will have something attractive and unique. You can train it low or high as you desire. Live Forever Rose can be trained as a climbing or as a bedding rose.

Prince Camille de Rohan—Very dark velvety crimson, changing to intense maroon.

Persian Yellow—Deep, bright yellow; small but handsome; double; a very early bloomer, and much the finest hardy yellow rose.

John Hopper—Bright rose with carmine center; large and full. A profuse bloomer and standard sort.

John Keynes—Of brilliant red, shaded with velvety crimson; magnificent buds; a variety that is very satisfactory to all lovers of roses; good grower.

Mad. Plantier—Pure white, large and very double. A free bloomer and grower.

Margaret Dickson—New, perfectly hardy and very vigorous. A free summer and autumn bloomer. Flowers white, pale flesh center, of a waxy texture and delightful fragrance.

Wholesale Price for all Varieties of Roses on this Page, Strong 2 Year Bushes, 75 cents each, 10 for $7.00.
Select Varieties of Hardy Roses

In spite of all the flowers which from time to time have become popular and have had their day as "fads," the Rose, the "Queen of Flowers," still holds her scepter and compels all others to acknowledge her queenly right and beauty.

The Roses which we offer below are all strong two-year field-grown bushes, American-grown.

Marshall P. Wilder—Bright cherry carmine; very fragrant and one of the freest bloomers. Vigorous.

Baron de Bonstetten—Flowers large and very double; color rich, dark red, passing to deep velvety maroon. Very fragrant.

Clio—New. The perfection in Hybrid Perpetuals. Of delicate satin blush with a little deeper center. Large, well shaped and very double. Strong, robust, hardy and prolific. A jewel.

Alfred Colcomb—Brilliant carmine crimson, very large, full, of fine globular form and extremely fragrant.

Anne de Diesbach—One of the best and most satisfactory Hybrid Perpetual Roses. A strong vigorous grower, extremely hardy; producing very large, double flowers, of a lovely shade of carmine and delightfully fragrant.

Blanche Robert—Pure white, large and full, buds very beautiful. A strong grower and a desirable variety.

Paul Neyron—This magnificent rose, by far the largest variety in cultivation; very double and full, of a beautiful deep rose color, and delightfully fragrant; borne upon vigorous, upright shoots in great abundance throughout the entire season. We recommend this variety very highly for general planting, as it is calculated to give more satisfaction to the masses than any other known variety.

Coquette des Blanches—Pure white, sometimes faintly tinged with pink; flowers of medium size, somewhat flat, but full and very pretty, growth more bushy and symmetrical than any of the others; one of the hardest.

Coquette des Alpes—White, slightly shaded with carmine; form semi-cupped; wood long ointed; large, handsome flowers. The strongest grower of the entire class.

Wholesale Price for all Varieties of Roses on this page, Strong 2 Year Bushes, 75 cents each, 10 for $7.00.
Propagated Where the Best Trees Grow

Hardy Climbing and Bush Roses

Length of time the flowers remain on the plant without failing, are qualities which make this rose an assured favorite.

Yellow Rambler—A strong grower, with large trusses of nearly double pale yellow flowers.

White Rambler—Also perfectly hardy and a strong, vigorous grower; flowers white.

Baltimore Belle—Pale blush, nearly white. Blooms in clusters.

Pink Rambler—Flowers medium size, pink, in clusters.

Baby Rambler—A dwarf (bush not climbing.) Everblooming; will bloom continuously through the Summer. Has the same bright crimson color as the climbing Crimson Rambler and blooms in clusters of 20 to 40 flowers at one time.

Rosa Rugosa

A valuable, perfect hardy type much used in landscape work; the heavy wood and shrubby formation adapting it to hedges and hardy borders, or to mixed shrubbery groups. The foliage is lustrous, dark green, usually corrugated and is impenetrable to attacks of insect pests. Flowers are borne in clusters of varying size and construction, are succeeded by persistent fruits which carry their usefulness into winter.

Rosa Rugosa Rubra—Single flowers, rosy crimson

Rosa Rugosa Alba—Pure white.

Moss Roses

Perpetual White Moss—Pure white.

Salet Moss—A vigorous grower and perpetual bloomer. Light rose, large, full. The best of the class. A true, perpetual moss blooming at intervals from June until November.

Wholesale price for all varieties of Roses on this page, strong 2 year bushes, 75 cents each, 10 for $7.00.
Buying Choice Trees and Plants by Parcel Post

It is easier to buy by mail than to go to a store. In many instances it is possible to buy a better quality of trees and plants by mail than can be procured in other ways.

The greater portion of our business is transacted through the mails. The planter in California can purchase with as great an assurance of satisfaction as if he personally selected his trees and plants.

Trees and Plants ordered are personally selected. One from our office, who has spent an entire lifetime in the business, carefully selects the trees and plants and follows instructions closely.

Our method of packing enables us to ship to remote sections with great success. We believe that we give more attention to digging and packing than is customary.

Our Mail Order Trees and Plants are flourishing in localities where the smoke of the railroad engine is never seen, and at other distant points where railroad charges would deter you from ordering.

Varieties of Trees and Plants—By Parcel Post Postpaid

Apple Trees by Parcel Post

For this season's mailing we have an extra fine block of one year old trees. Such trees that every buyer will be pleased with. The varieties are: Northern Spy, Yellow Transparent, Wealthy, Baldwin, York Imperial, Duchess, Wagener, King, Jonathan, McIntosh, Banana and Delicious.

Parcel Post Price of Apple Trees 3 ft. high, 50c each, 10 for $4.85.

Standard Pear Trees

We have by a special method grown some mailing size trees of a few varieties as follows: Bartlett, Kiéffer, Clapp's Favorite, Seckel and Flemish Beauty.

Parcel Post Price of Pear Trees 3 ft. high 75c each, 10 for $6.50.

Cherry Trees

For this season we can dig some extra fine mailing size trees, very strong, well rooted trees, of varieties as follows: Early Richmond, Montmorency, English Morello, Dwyhouse, Windsor, Napoleon and Black Tartarian.

We can supply the following varieties: Duchess, Seckel, Clapp's Favorite, and Bartlett.

Parcel Post Price of Dwarf Pear Trees, 2 to 3 feet high 55c each, 10 for $5.00.

Plum Trees

Plum trees generally grow so heavy at one year old that it is impossible to get mailing size trees, but we have some nice trees, strong, heavy rooted, three feet high, of varieties as follows: Abundance, Burbank, Climax, Red June, Wickson.

Parcel Post Price of Plum Trees 3 ft. high 60c each, 10 for $5.50.

Raspberries—All varieties offered in catalogue by Parcel Post at 10 for $1.15.

Blackberries—All varieties offered in catalogue by Parcel Post at 10 for $1.25.

ORNAMENTAL SHRUBS, ROSES AND VINES—Strong, well rooted bushes of all varieties offered can be sent by Parcel Post if 3 CENTs EXTRA IS ADDED TO EACH PRICE QUOTED IN THIS CATALOGUE.

Peach Trees

We offer varieties of mailing size peach trees as follows: Niagara, Elberta, Early and Late Crawford, Champion, Carman, Fitzgerald, Reev's Fav., Chair's Choice, Greensboro, Kalamazoo and Crosby.

Parcel Post Price of Peach Trees 2 to 3 ft. high 50c each, 10 for $4.50.

Quince Trees

We offer three varieties of mailing size quince trees: Orange, Bourgeat and Champion. Very strong, heavily rooted, 2 to 3 feet.

Parcel Post Price 65c each, 10 for $6.00.

Dwarf Apple Trees

Our list of varieties is: Delicious, McIntosh, Baldwin, Grimes' Golden, Wealthy and Yellow Transparent.

Parcel Post Price for Dwarf Apple Trees 2 to 3 feet high 70c each, 10 for $6.50.

Grape Vines

Worden. A splendid black grape.
Moore's Early (Black). Bunch and berry large, round with heavy blue bloom.
Concord. Bunch large, compact, berries large.
Brighton. The best red grape in cultivation.
Diamond. Leading early white grape.
Niagara. Occupies the same position among white varieties as Concord among black.

Parcel Post Price of Grape Vines 1 yr., 35c each, 10 for $3.25.
